The Trek

The K2 Base Camp Trek Classic is the original and most traditional route to the foot of the world's second-highest mountain — a 21-day return journey along the legendary Baltoro Glacier that follows the same path taken by the great mountaineers of the past century. You trek in, reach K2 Base Camp and Concordia, and return via the same route — seeing the magnificent landscape from both perspectives, in changing light. Why Choose the Classic Route? The classic out-and-back route on the Baltoro Glacier is the best choice for trekkers who want the full K2 Base Camp experience without the technical demands of the Gondogoro La crossing. It is more accessible to first-time high-altitude t

Fitness & grade. A strenuous trek with a high point of 5,150 m, repeated days at altitude. You should be a fit, regular hill-walker, comfortable with long days on rough ground and the real remoteness of the Karakoram. No previous Himalayan experience is required, but a good training base is essential.

Training & Preparation

This is a serious multi-day trek with repeated days at altitude and a high point well above 4,500 m. Your enjoyment depends heavily on arriving fit. Build your training over months, not weeks — the cumulative load of consecutive days on rough ground is the real challenge.

Build endurance

- Long hill walks, 5–7 hours, on consecutive days
- Carry a 6–8 kg pack in training
- Add stairs, hills and incline work weekly

Strengthen

- Legs, core and ankles for rough ground
- Downhill practice — descents are punishing
- Two trekking poles, used in training too

Skills & mind

- Comfort on steep, loose and snow-patched ground
- Break in your boots thoroughly before you fly
- Prepare mentally for cold, camp life and remoteness

Day by Day

Porters on a Karakoram trail

1
DAY

540 m Arrive

Arrive Islamabad

Arrive in Islamabad for a warm welcome and the pre-trek briefing.

2
DAY

2,500 m Flight

Fly to Skardu

Fly to Skardu (2,500m) and take an easy acclimatization walk.

3
DAY

2,500 m Rest / Acclimatise

Skardu Prep

Gear checks and permits in Skardu, with a drive into Shigar Valley.

4
DAY

3,000 m Trek

Skardu to Askole

4x4 jeep to Askole (3,000m) via Shigar Valley - the trailhead for the Baltoro.

5
DAY

3,050 m Trek

Askole to Jhola

First steps on the Baltoro trail, following the Braldu to Jhola (3,050m).

6
DAY

3,420 m Trek

Jhola to Paiju

Trek through the Braldu valley to Paiju (3,420m) at the foot of the glacier.

7
DAY

3,420 m Rest / Acclimatise

Rest at Paiju

An acclimatization day at Paiju under the Trango Towers.

8
DAY

3,795 m Trek

Onto the Baltoro

Step onto the Baltoro Glacier and cross to Khoburtse (3,795m).

9
DAY

3,930 m Trek

Urdukas

Climb to Urdukas (3,930m), a balcony above the ice under the Trango Towers.

10
DAY

4,295 m Trek

Goro II

A day on the open glacier to Goro II (4,295m).

11
DAY

4,500 m Trek

Concordia

Reach Concordia (4,500m), the throne room of the mountain gods.

12
DAY

5,150 m Trek

K2 Base Camp

Walk to K2 Base Camp (5,150m) and Broad Peak BC, under the second-highest mountain on earth.

13
DAY

4,500 m Rest / Acclimatise

Rest at Concordia

An acclimatization day to rest and take in the peak views.

14
DAY

4,500 m Trek

Godwin-Austen Glacier

A second day at Concordia exploring the Godwin-Austen Glacier.

4,295 m Trek

Begin Return

Turn for home, retracing the Baltoro to Goro II (4,295m).

3,930 m Trek

Goro II to Urdukas

Back down the glacier to Urdukas (3,930m).

3,420 m Trek

Urdukas to Paiju

Descend the Baltoro to Paiju (3,420m).

3,050 m Trek

Paiju to Jhola

Trek down the Brahdru valley to Jhola (3,050m).

2,500 m Trek

Askole & Skardu

Walk out to Askole - trek complete - then drive to Skardu.

2,500 m Rest / Acclimatise

Skardu Rest Day

A rest day in Skardu with a celebration dinner and gear return.

540 m Depart

Departure

Fly from Skardu to Islamabad for departure.

What's Included

Included

- Return domestic flights, all transport, accommodation, all trek meals, licensed Balti guide, porters, cook, and all permits.
- Satellite phone and daily safety monitoring throughout.

Not Included

- International flights, Pakistan visa fees, personal travel insurance, personal gear, and tips.

On the Trek

● 100% local Balti team

Our own guides, cooks and porters from the mountain valleys — not a brokered hand-off. People who have grown up under these peaks.

● Satellite phone in camp

A Thuraya sat phone on every trek for logistics, weather and emergency coordination where there is no mobile signal for days.

● Real rescue planning

Established helicopter-rescue contacts and clear evacuation procedures. Rescue is arranged on your behalf and billed to your insurance — never “free”.

● Altitude managed

Built-in acclimatisation and reserve days, a portable altitude chamber (PAC/Gamow bag) and a comprehensive medical kit carried with the group.

Temperatures by altitude

Best season: Summer (June - September)

Valleys 2,000–3,500 m

Mid camps 3,500–4,300 m

High camps 4,300–4,950 m

High point 5,150 m

+5 °C nights

up to +35 °C days

around 0 °C

+18 °C in sun

down to -8 °C

cold, bright days

sub-zero, wind

A high camp in the Karakoram

Possible Risks

We do not hide the hazards of high mountains — being honest about them is how we keep people safe. Here is what you are taking on, and how we manage it.

Altitude illness

The main hazard on any high trek. AMS is common; the dangerous forms (HACE and HAPE) are rare but serious. We manage it with a graded, acclimatisation-first schedule, reserve days, daily monitoring, a portable altitude chamber and the readiness to descend.

Steep & remote ground

Long days on rough moraine, scree and snow patches, far from help. We pace carefully, choose safe lines and never rush exposed sections.

Glacier & rivers

Crevasses, unstable moraine and glacier-fed rivers that run fast on hot afternoons. We choose lines and timings carefully and rope up where needed.

Mountain roads

Jeep tracks and mountain highways can be long, narrow and exposed. We use experienced drivers and well-maintained vehicles.

Weather & flights

Mountain flights cancel and weather can pin a group; buffer days are built in so a delay does not derail the trek.

Food, water & remoteness

Stomach upsets are the most common complaint; we treat all water and cook hygienically. Above all this is remote country — you may be days from a hospital and evacuation depends on weather.

Insurance

Cover is mandatory

You cannot join this trek without travel insurance, and you must bring written proof. We check it before departure. Standard holiday insurance will not cover high-altitude trekking — you need specialist adventure cover.

What your policy must include

Trekking to at least 5,500 m; helicopter search, rescue and evacuation; emergency medical treatment and repatriation; and ideally trip cancellation. Read the altitude limits and rescue clauses carefully before you buy.

Where to look

Specialist providers such as Global Rescue, the Austrian Alpine Club / BMC schemes, or dedicated expedition insurers typically offer suitable cover. Confirm in writing that your altitude is included.

Helicopter Rescue Procedure

There is no road and no quick way out of the high Karakoram. A serious illness or injury is evacuated by helicopter — a process that is neither automatic nor free, and which weather can delay for hours or days. Understanding how it works is part of trekking here responsibly.

1 • The call

The emergency is reported by our satellite phone to our operations base, which contacts the rescue authorities. This is why a sat phone travels with every trek.

2 • The guarantee

Military aviation — the only operator permitted to fly rescues in this region — is tasked once a financial guarantee is confirmed. This is exactly why proof of insurance must be in place before the trek begins.

3 • The flight

Helicopters fly in pairs for safety and can only operate in suitable weather and below their altitude ceiling. A casualty high up may first need to be moved to a lower, safer landing site by the team.

4 • The cost

All rescue and evacuation costs are charged to your insurance. Rescue is never free or included in your trek price — our role is to coordinate it quickly and keep you stabilised while help is arranged.

Health & Medicine

We carry a comprehensive group medical kit and a portable altitude chamber, and our leaders are trained in remote first aid. You should still bring your own small personal kit. This list is general guidance only — please discuss your medication, and especially altitude drugs, with a travel-medicine doctor before you travel.

Altitude

- Acetazolamide (Diamox) — aids acclimatisation
- Emergency altitude drugs only on a doctor's advice
- Know the symptoms of AMS, HACE and HAPE

Stomach & gut

- Oral rehydration salts (e.g. Dioralyte)
- Loperamide for diarrhoea
- A doctor-prescribed antibiotic for gut infections

Pain & fever

- Paracetamol and ibuprofen
- Aspirin
- Throat lozenges for the dry, cold air

Wounds & skin

- Blister care (Compeed) and zinc-oxide tape
- Antiseptic wipes and a range of plasters
- High-SPF sunscreen and lip balm

Personal

- All your regular prescription medicines, in carry-on
- A copy of prescriptions and any allergies
- Rehydration and electrolyte tabs

Good to know

- Tell your leader of any condition or allergy
- Diamox is a sulfa drug — check for allergy first
- Start personal medication advice early, not last-minute

Kit List

The recommended kit for this trek. Your leader checks gear before departure. A porter carries your duffel; you carry a light daypack.

Footwear & feet

- Broken-in waterproof trekking boots with ankle support
- Trekking + warm socks
- Camp shoes / down booties
- Gaiters for snow and scree

Clothing layers

- Base layers (top & bottom)
- Fleece or soft-shell mid layers
- Waterproof shell jacket & trousers
- Insulated down jacket
- Trekking trousers & shorts

Head, hands & eyes

- Warm hat + sun hat + buff
- Liner gloves + warm gloves
- Glacier / mountain sunglasses
- Head torch + spare batteries

Trail & glacier

- Two trekking poles
- Microspikes for icy / snow sections
- 35–45 L daypack
- 100–120 L waterproof duffel (porter-carried)
- Water bottles x2 + purification

Sleep & personal

- 4-season sleeping bag (to -15 °C)
- Inflatable sleeping mat
- Personal first-aid kit (see medicine list)
- Toiletries & quick-dry towel
- Power bank / solar charger

Cultural Considerations

You are a guest

You travel through Muslim mountain communities with their own languages and deep traditions of hospitality. Meet them with respect and you will be welcomed everywhere.

Dress modestly

Both men and women should keep shoulders and knees covered in villages and towns. For women, loose clothing and a light scarf are appreciated.

Photography

Always ask before photographing people — and never photograph women without clear permission. A smile and a gesture go a long way.

Ramadan & prayer

During Ramadan, eat and drink discreetly out of respect for those fasting. Around mosques and prayer times, keep a low profile.

Respect the crew

Our porters and cooks are skilled local people, not servants. Treat them as teammates and the whole trek is richer for it.

A few words

“Assalam-o-Alaikum” (peace be upon you) is the universal greeting; “Shukria” means thank you. A little effort with language is always met with delight.

Responsible Travel

Trekking here should leave the mountains and the communities better, not worse. We run these trips to put income into local hands and keep the Karakoram clean.

People

- Local guides, cooks and porters, fairly paid
- Capped, fair porter loads and proper gear
- Spending that supports villages and the bazaar

Place

- Carry out all non-biodegradable waste
- Toilet tents and proper waste management in camp
- Stay on trails; protect fragile alpine ground and wildlife

Communications & Money

Connectivity

Phone signal and wifi exist in the towns, but there is no mobile coverage on trek — for the trekking days you are off-grid. We carry a Thuraya satellite phone for safety and logistics; personal calls are possible at cost. GPS tracking lets family follow your progress. Tell people at home about the communications gap before you go.

Money & tipping

Bring your spending money as cash in USD, EUR or GBP — there are limited ATMs in the towns and none on trek. Tipping the crew is an expected custom: budget a fair amount into a shared group fund, divided among guides, cooks and porters. Keep some small cash for drinks, handicrafts and the bazaar.

Visa & Permits

Trekking visa & permits

Pakistan requires a visa for entry; restricted-zone treks additionally need a Trekking & Mountaineering visa — distinct from a standard tourist visa. We advise on the right category and provide an invitation letter and supporting documents.

Permits & NOC

National-park entry, trekking permits and any No-Objection Certificate for restricted zones are arranged by us and included in your trek price where applicable.

Passport & insurance

Passport valid 6+ months with blank pages. Travel insurance covering trekking to 5,500 m and helicopter evacuation is mandatory — bring written proof.
